

Avid Artist | DNxID—Get super affordable, ultra-portable I/O

Take your I/O to go

Whether you're an editor on the go, a post editor working on location, or simply budget-minded, you can now have professional-grade I/O with you wherever you and your laptop travel. The new Avid Artist | DNxID sports a small yet rugged backpack-friendly design, enabling you to capture, monitor, and output HD and high-res content in the field, in the studio, or in a hotel room.

Accelerate your workflow

Get the high-res media acceleration of big brother Avid Artist | DNxIQ, at a fraction of the price. Avid Artist | DNxID offers hardware baseband encoding to Avid DNxHR, making it easy to work with large 4K files without slowing down your workflow. Bundle the interface with Media Composer to maximize your editorial efficiency. You can also record voiceovers and live audio with easy punch-in recording to Media Composer, and monitor HDR content in all of its stunning glory.

Connect to media sources

Don't have an SD card slot or extra USB port on your spiffy new laptop? No worries. Avid Artist | DNxID features an SDXC (Secure Digital Extended Capacity) card slot that enables you to access media stored on high-capacity SDXC UHS-II cards. It also provides a USB-C port to

connect cameras, hard drives, and other media devices to bring fresh footage into your projects.
