SHORT DESCRIPTION/ PRODUCT INFO: (40 characters)

**Beatformer** is an audio effect for musical beat sculpting

LONG DESCRIPTION/ PRODUCT INFO: (500 – 800 characters) 3<sup>rd</sup> party please

**Beatformer** is an all-in-one beat sculpting plug-in for the modern beat maker. Beatformer allows you to effortlessly shape your beats and enhance their dynamics without compromising their character and musicality. You can use **Beatformer** in every beat track, either you want transparent or extreme sound manipulation. Use Beatformer to add substance to thin sounds, to add colour and personal character and to glue your drum mix together. The plugin has four intuitive controls (Boom, Punch, Squash and Air) that offer powerful Digital Signal Processing in a delicate design. With more than a dozen high-quality algorithms under the hood, **Beatformer** opens up a wide range of musical beat shaping possibilities.

FEATURES: Bullet points only/ 3<sup>rd</sup> party please

- Semantic Knobs
- Simple and streamlined user interface
- Tuned algorithms for quick dynamics detection
- Subtle-to-Extreme audio processing
- Uncompromised sound quality
- Transparent Limiter
- Low latency (4ms)
- Resizable UI
